Education

SND College of Engineering: B.E. – Computer Science Engineering 2021-2025

- CGPA: 7.99/10.0
- Coursework: Data Structures and Algorithms, Object Oriented Programming, Database Management System (SQL), Operating Systems, Computer Networks

12th - Atma Malik International School, (HSC) PCM – CBSE: 79% 2019-2021

10th -Atma Malik International School, (SSC): **91%** 2018-2019

Technical Skills

Languages & core: Java, Python, OOPs, SQL, JavaScript, C++, HTML5/CSS3.
Technologies: REST API, MySQL Server, JWT (JSON Web Tokens), Linux, AWS (ongoing)
Backend & Security: Node.js, Express.js, Bcript, Backend Development, Data Structures & Algorithms, Web Development.
Tools: Git/GitHub, Postman, MySQL Server, Ollama CLI, VS Code, MS Excel, MS PowerPoint, MS Word, MS Outlook
Methodologies: SDLC - Agile, desired to learn Share Point application building ,Power Pages , Automate flow creation
Soft Skills: Team Collaboration, Analytical thinking, Adaptability, logical thinking, Verbal and Written Communication

---

Development Intern, Towards Imagination Pvt. limited – Internship (Dec 2023 to Jan 2024)

- Developed and modified core modules for internal applications based on functional specifications
- Conduct research into new technologies and assisted in testing and configuration management.

Data Analyst, AI Variant – Internship (May 2025 to Nov 2025)
MSFT Power Bi Developer, Freelance work (Nov 2025 to Dec 2025)
Learning Content Creation on LinkedIn and GitHub: Gen-AI, Agentic AI, Python (Ongoing)

Projects

AI-Based Object Detection, Distance Measurement & Speaking System for Blind Stick (Final Year Project) **(Link)**

- Developed a smart stick for the visually impaired using Raspberry Pi, integrating real-time object detection, distance measurement, and voice alerts. Implemented OpenCV for object recognition, ultrasonic sensors for distance, and text-to-speech for audio feedback. Collaborated with team members. Documented system requirements and test cases.
- Features: Accurate detection, audio feedback, outdoor navigation, compact design, low cost
- **Tools Used:** Python, Node-MCU, OpenCV, TensorFlow, YOLO-V8

Instagram Clone - Full-Stack System Architecture **(Link)**

- Engineered a secure backend system using Node.js, Express.js, to manage 11+ Rest API endpoints
- Implement JWT and bcrypt to ensure strict authentication and secure user sessions.
- **Designed a relational SQL** schema to manage many to many relationships for followers and dynamic feeds.
- Controlled testing and documentation of API performance using Postman
- **Tools Used:** Node.js, Express.js, MYSQL (SQL), JWT, Bcrypt, Postman, Git

Healthcare Appointment Management System : C#, ASP.NET core, SQL Server **(Link)**

- **Architect** a scalable Backend Web API using **MVC design patterns** to streamline patient registration scheduling.
- Utilized **Database Architecture** principles to perform **Data Modelling** for the Healthcare Appointment System, ensuring data integrity.
- **Implemented** server-side validation logic to **debug** and prevent data entry errors during the appointment life cycle.

Achievements & Certifications

- **Training and Student Placement and Event Coordinator**, SNDCOE - Computer Department
- Winner of College level **Competitive Coding Competition.**
- Awarded with **NPTL Certificate** for Data Science, **Google** Data Analysis certification(Python, SQL, Power BI, MS Excel)
- **5 - star Python, SQL** on HackerRank, **CodeChef** awarded for Python Programming
- Qualified: **50+ competitive exams** (National, State-level)
